

Vypočítej a výsledek zapiš zlomkem v základním tvaru

$$\begin{aligned}
 \frac{\frac{6}{5} \cdot \frac{5}{12}}{\frac{3}{5} - \frac{2}{5} : \frac{4}{5}} &= \frac{\frac{5}{2}}{\frac{3}{5} - \frac{2}{5} \cdot \frac{5}{4}} = \frac{\frac{5}{2}}{\frac{3}{5} - \frac{2}{4}} = \frac{\frac{5}{2}}{\frac{12-10}{20}} = \frac{\frac{5}{2}}{\frac{2}{20}} = \\
 &= \frac{5 \cdot 20}{2 \cdot 2} = \frac{100}{4} = 25
 \end{aligned}$$
